Portfolio <https://sandy-lyy.github.io>

Internship availability: 4–6 months Available immediately

Education

University of Bristol

MSc Marketing (Digital)

Sep 2025 – Jun 2026

BNU-HKBU United International College (UIC)

BA Public Relations and Advertising

Sep 2021 – Jun 2025

GPA 3.4/4.0 (top 5%–20%)

Work Experience

Joyy Inc.

Shipline Cross-border E-commerce | Marketing Intern

Shenzhen, China

Jun 2024 – Sep 2024

1. Planned and delivered a salon event in Hong Kong end to end, covering venue selection, budgeting, materials preparation and poster design
2. Ran a targeted email marketing campaign for the Australian market, spanning content creation, visual layout, audience data collection and analysis, and full performance monitoring; achieved a 30% click-through rate
3. Produced competitor social media analysis reports to support the brand's overseas expansion
4. Contributed to the design and production of brochures, posters and presentation materials

Guangzhou iBlue Communications

Client Services | Assistant Account Executive (AAE)

Guangzhou, China

Jun 2023 – Sep 2023

1. Applied CPM and CPE data to select and evaluate KOLs for P&G brands, securing 50+ influencer collaborations and reviewing and refining 30+ sponsored posts and videos
2. Refined product briefs around seasonal trends and trending topics to drive brand campaigns
3. Drafted a livestream collaboration proposal between Pantene and a leading KOL

Guangzhou Alpha Space-Time Sports Development Co.

New Media Operations

Guangzhou, China

Jul 2022 – Aug 2022

1. Ran the Xiaohongshu (RED) account for Canton Tower attractions end to end (topic ideation, copywriting, image editing), growing per-post likes and saves from single digits to nearly 1,000; edited nearly 20 Douyin and 3 Bilibili videos, one exceeding 1,000 likes

Projects

MSc Dissertation: Persona-Conditioned LLMs as Synthetic Consumers Independent research Feb 2026 – Jul 2026

1. Designed and implemented a large-scale prediction experiment on public Amazon review data: built LLM personas from the review histories of 600 real consumers across 6 product categories to predict each consumer's next 1–5 star rating (leave-last-out design)
2. Independently built an automated LLM experiment pipeline in Python (agent-style workflow) integrating batch persona construction, API calls, response parsing and accuracy evaluation; model chosen via pilot comparison, fully reproducible with fixed random seeds
3. Identified boundary conditions of accuracy via regression and moderation analysis, with consumer rating variance the strongest factor, providing empirical evidence for applying synthetic consumers in market research

The Ordinary Customer Review Analytics Semantic gap analysis Mar 2026 – Apr 2026

1. Analysed 30k+ Sephora reviews using time-decayed negative-review impact analysis, ingredient risk ratios and semantic gap analysis (Sentence Transformer + BERTopic) to locate the drivers of negative customer experience
2. Translated the insights into three business recommendations (an AI skincare assistant, sensory product copy, and a community loyalty programme) in a strategy report addressed to brand management

Skills

AI Applications: Prompt engineering, LLM APIs, agent workflow automation, AIGC content generation, AI for marketing and consumer research (Proficient)

Data Analysis: Python (pandas), R, SPSS (PROCESS, regression and moderation analysis), Excel (PivotTables, VLOOKUP, Power Query) (Skilled)

Marketing Research: Consumer research, market and competitor analysis, survey design, data visualisation, marketing analytics (Skilled)

Design Tools: Photoshop, Illustrator, Figma, Premiere Pro, Canva (Skilled)

Languages: English (IELTS 6.5, CET-6), Mandarin (native), Cantonese (Proficient)
